

## New Website – Summer 2022

The new website is being developed by Stephanie Dickie & Megan Brand. Essentially volunteering, unfortunately no one on Thetis was available to do this work.

The layout is all about accessibility – as each component is completed it is made part of the website. All content needs to be created and uploaded by TICA to the shared drive. Once the information is there, it is “installed”. This is what is taking the longest – much of what we are looking for hasn’t been created yet.

Initial content when it goes live will be activity & booking calendar, booking forms, booking initiation link, membership information and applications.

A list is being compiled of content required and will be shared with the Board once fine tuned.

Looking for historic photos to make up a small gallery. As events are held, current photos can be added.
